

CRYSTAL LAKE
(Anonymous Pond)
Harrison Twp., Cumberland Co.
U.S.G.S. Norway, Me.

Fishes

Salmon	Chain pickerel
Lake trout (togue)	Hornpout (bullhead)
Smallmouth bass	Smelt
Largemouth bass	White sucker
White perch	Minnows
Yellow perch	Sunfish

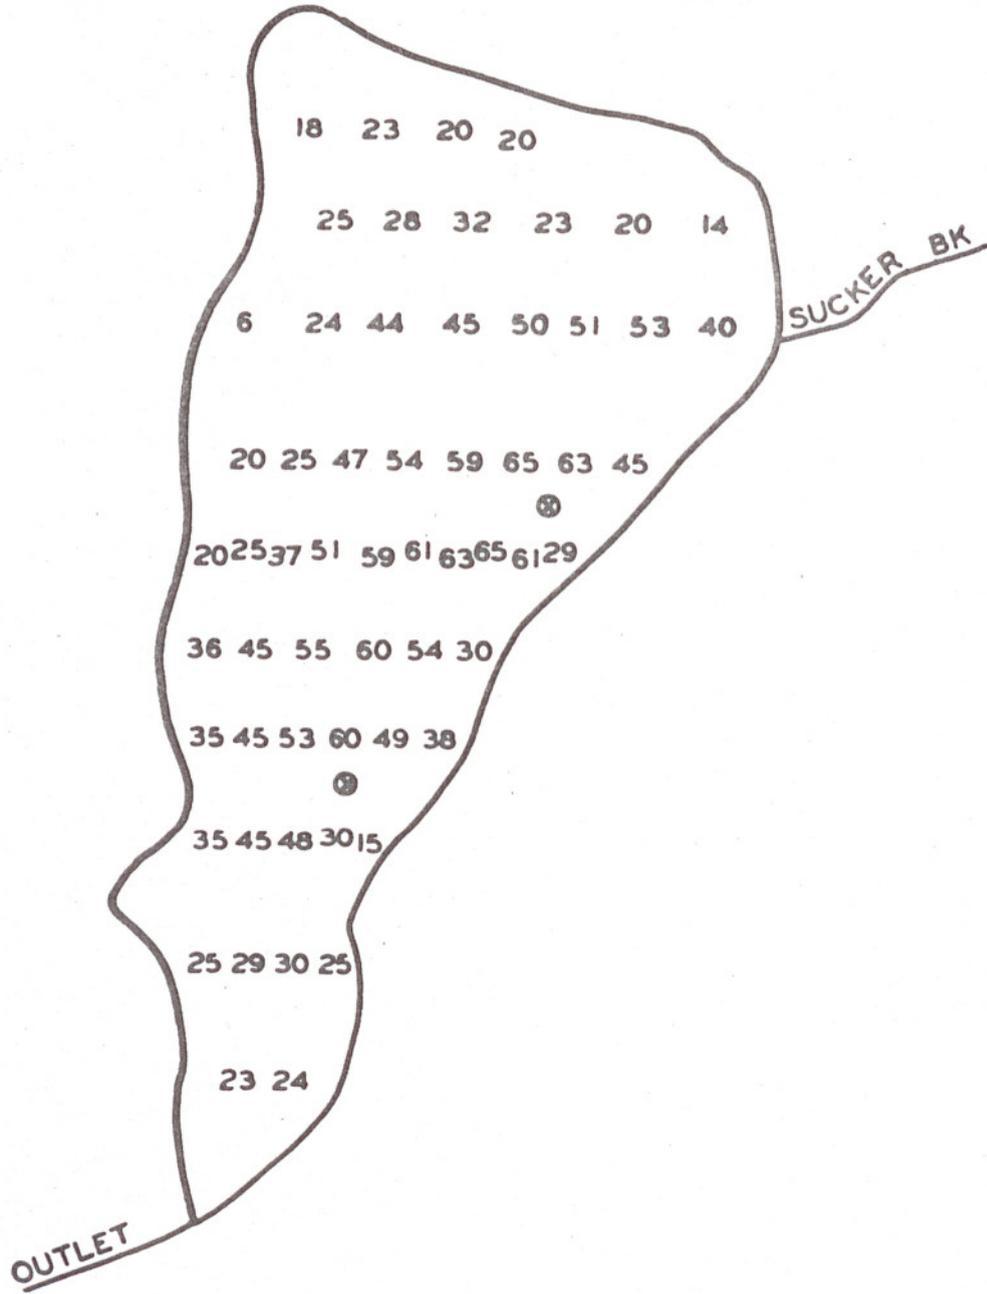

Physical Characteristics

Area - 461 acres	Temperature
	Surface - 78° F.
Maximum depth - 65 feet	58 feet - 46° F.

Suggested Management

Crystal Lake has a tremendously large population of smallmouth bass and since good fishing is enjoyed, continued management for this species is recommended.

A satisfactory togue fishery justifies continued management of this species.
